WRITING & CONTENT

WORK

- Active blogger on Medium; writes on society, philosophy, mindset, and personal insights. ([Click Here](#))
- Articles published under the “Student x Student” publication.

CAREER OBJECTIVE

A third-year Computer Science student open to part-time roles and internships across tech, content, and operations. I'm strong at organizing tasks, doing deep research, and delivering work effectively within deadlines. I enjoy building functional projects using a mix of coding and AI tools, and I'm always learning fast. I'm looking for opportunities where I can contribute meaningfully, grow my skills, and move toward becoming financially independent.

SKILLS

Technical Skills : Python , JavaScript, C, MachineLearning (Basics), HTML/CSS, API Integration, MySQL, MongoDB, Version Control (Git & GitHub)

Development Skills :

- Frontend development with React (beginner–intermediate).
- Able to build complete functional websites using AI-assisted development.
- Understanding of how web applications work end-to-end.
- Good sense of UI/UX and clean layouts.

PROJECTS

OtakuOrbit – [Full-Stack Anime Community Platform](#)

Tech: MERN Stack

- Built a functional anime community platform where users can explore trending anime, share posts, and join discussions.
- Developed login system, posting features, and smooth community interaction options.
- Managed both frontend development and backend logic using AI-assisted workflows.
- Created a clean and responsive UI for a seamless experience.

EXPERIENCE AND ACTIVITIES

Event Management & Anchoring

- Hosted and managed multiple college events, including tech and cultural fests.
- Coordinated with teams, handled crowd engagement, and ensured smooth event execution.

Entrepreneurship Cell Member

- Actively involved in planning startup-focused activities and discussions.
